

as a subscriber to xm sattelitte radio i appreciate the up to date,up to the minute traffic and weather forecasts especially when i'm driving to pick up the kids after work or before work or family events.
you can listen to what you want when you want it and then return to music rather than wait for the radio schedule or wait at home until the tv forecasts the news or weather.

it would be a tragedy to silence this network or infringe upon their and my liberties for commercial laden broadcasters,

and i pay to not be offended by their ads and interruptions.
also the subscriber base is too small too interfere with the money grubbing broadcasters whom pander to the tastes of a majority.
whereas i can choose whatever i like whenever i like.
